

## **UPDATED BIO-SECURITY FOR TABLE MOUNTAIN RANCH**

At Table Mountain Ranch, keeping our horses safe and healthy is everyone's foremost objective. As we increase the number of public activities offered at TMR we are increasing our equine bio-security.

Effective immediately:

- TMR will require all haul-ins, including show and clinic participants, to provide a current Coggins and vaccination record.
  - A Coggins is considered current if dated within 12 months of the activity attended.
- Eastern/Western Encephalomyelitis, Tetanus and West Nile will be required on an annual basis.
- Rhino and Flu will be required every six months. It is the responsibility of individual horse owners to provide current records when due.
- TMR reserves the right to refuse entry into any event due to insufficient records or the appearance of an unhealthy horse.
- Records may be downloaded and emailed to:  
sherl@tablemountainranch.net
- Records may also be attached to your clinic and/or show registrations in most instances.
